

# LETTER OF RECOMMENDATION

We needed help with one of our Data Science Training projects and [gradify.ai](https://gradify.ai) was able to fill the gap perfectly. The collaboration was smooth and productive from day one.

Krzysztof Palczewski displayed a good mix of technical expertise with business understanding that proved very effective in the diverse project environment. He was able to explain various ML concepts to a wide audience and support this with a productive hands-on training.

I can recommend working with Krzysztof.
